IMPROVE BRAIN POWER THROUGH MOVEMENT

- Learn a simple method for finding which of 32 profiles fit you
- Discover why your personal profile affects how you learn & perform
- Unlock valuable information about yourself, family, co-workers, friends

Your OPTIMAL BRAIN ORGANIZATION PROFILE is a key for unlocking your potential, and for understanding and overcoming barriers to learning and performing at your highest level. This Brain Gym Level 201 course clearly explains a method for determining your Profile that is so simple, non-invasive and easy to learn that even a child can do it.

Scientists, educators, and psychologists have long suspected there are links between the side of the body we favor for seeing, hearing, touching, and moving and the way we think, learn, work, play, and relate to others. Here at last a neuroscientist explains these linkages - why it is so important to understand them - and how to use this self-knowledge.

This is an opportunity for teachers, parents, and all of us who need to understand what makes ourselves and others tick, and to learn methods you'll be using and talking about.

BRAIN GYM®

- Physical exercises that promote learning readiness.
- Coordinated movements are an all round cost-free tonic to the nervous system and a tremendous boost to learning potential at any age.
- Movements stimulate the vestibular system, and increase communication between the left and right brain hemispheres.
